Safety Task Assignment

SOCCO's Safety Task Assignment (STA) process significantly impacts the success of our safety culture and the reduction of incidents. The interactive process requires that management/supervisors and employees shall:

- Define the general task for each activity.
- Identify known and potential safety hazards associated with the task.
- Determine work practices to complete the task safely.
- Address requirements for all personal protective equipment.
- Establish that all crew/department employees understand the above information.
- Each crewmember is empowered to continuously participate in this process in an effort to promote our ZERO Incidents culture.
- Safely execute the task as described—if conditions change, revise accordingly.
- Ensure prompt reporting of any injury, no matter how minor, to the project Supervisor.

STAs will be completed daily prior to work start & when tasks/conditions change. Post this STA in an obvious place throughout the duration of the task. Each crewmember involved with the task will sign this STA.

Know the emergency procedure for your work area!
